standards

# MINE-X<sup>®</sup> Muffler-Purifiers

*MINE-X<sup>®</sup> muffler-purifiers eliminate toxic gases and odor from engine exhaust.*

## High Exhaust Purification

MINE-X<sup>®</sup> muffler-purifiers eliminate dangerous carbon monoxide (CO), hydrocarbons (HC) and odor from LPG, gasoline, diesel, and natural gas fueled industrial vehicles and equipment. By using the most advanced catalyst formulations, MINE-X<sup>®</sup> muffler-purifiers are able to eliminate dangerous engine emissions even at low exhaust temperatures.

## Quick & Easy Installation

Every MINE-X<sup>®</sup> muffler-purifier is an exact OEM replacement muffler, making installation quick and easy. The direct replacement design eliminates the need for costly exhaust system modification and down time. MINE-X<sup>®</sup> muffler-purifiers are ideal for applications that have limited space in the exhaust system.

## The MINE-X<sup>®</sup> Advantage

Each MINE-X<sup>®</sup> muffler-purifier contains a patented stainless steel honeycomb, which is brazed to its stainless steel shell through a proprietary vacuum brazing process. This unique brazing process eliminates the possibility of the honeycomb loosening, cracking or telescoping inside the muffler.

## Low Maintenance

Advanced catalyst coating technology combined with the ultra thin walls of the stainless steel honeycomb provide a large open cross section that virtually eliminates purifier clogging and costly maintenance.

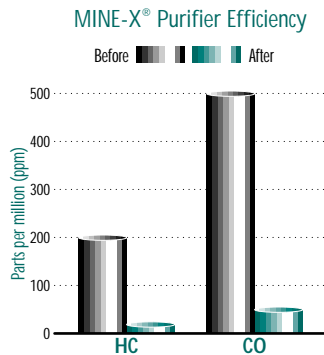

*"The brazed metallic substrate design was the most durable"*

### Durable Construction

MINE-X® muffler-purifiers are designed for the rigorous demands of industrial equipment applications. Heavy gauge materials, superior workmanship and strict quality control ensure the durability and worry free performance of every purifier. To help ensure maximum purifier life, a pyrometer kit is also available with a dash mounted indicator displaying exhaust temperature.

### Cost Effective

The durable honeycomb construction and highest quality materials, coupled with superior customer service and technical support make MINE-X® muffler-purifiers the most cost-effective solution to today's strict emission standards.

### Excellent Noise Reduction

MINE-X® muffler-purifiers provide noise reduction that is better than or equal to the original muffler.

### Lowest Back-Pressure

The unique MINE-X® honeycomb design provides the lowest exhaust flow restriction and engine power loss of any purifier available on the market today.
